How to Use & Connection Guide

- 1 **Connect Video Source:** Plug an HDMI cable from your camera, console (PS5/Switch/Xbox), or PC into the **HDMI INPUT** port.
- 2 **Connect Monitor (Optional):** Plug an HDMI cable from the **HDMI OUTPUT** port to your TV/ Monitor for real-time monitoring.
- 3 **Connect to PC:** Plug the USB 3.0 port into your laptop or computer.
- 4 **Audio Setup:** Attach a 3.5mm microphone and headphones directly to the device for live voice-over and direct audio monitoring.
- 5 **Software Setup:** Open OBS Studio, add a new **Video Capture Device**, and select **MS2130**. Set audio settings to capture high-quality stereo audio.

Frequently Asked Questions (FAQ)

Q: Is any driver installation required?

A: No, the MS2130 is 100% Plug and Play using standard UVC drivers across Windows, macOS, and Linux.

Q: Can I capture 4K video while viewing 4K on a TV?

A: Yes, it supports 4K@60Hz zero-delay HDMI pass-through to your monitor while simultaneously capturing up to 4K@30Hz or 1080p@60Hz to your PC.

Q: Can I use this with DSLR cameras for Zoom or live streams?

A: Absolutely! Connecting your camera via HDMI turns it into a high-definition webcam for streaming, teaching, or video calls.
